

Design and Technology Week 4

Read through powerpoint:

How many adjectives can you think of to describe biscuits? (e.g. crunchy, sweet, savoury, plain, crumbly, etc.) Children to think and share their ideas, then complete the mindmap on the slides.

Tell children that today they will be exploring a variety of biscuits to explore their taste, texture, and appearance, as well as their brand and cost.

What do we need to do before we start to work with food (wash hands, make sure surfaces are clean, etc.)?

Provide children with several biscuits (4 or 5), labelling each with the brand name and price of the packet. Children to draw each biscuit once they have tasted it and write notes around each one to describe the taste, texture, brand, price and give it overall marks out of 10.

Once they have finished testing all the biscuits and have finished their biscuit 'collage', ask children to discuss their work with you. What did you agree on? What did you disagree on? Which biscuit scored most highly altogether? Why?
