

Add and subtract 1, 10, 100, 1000, 10,000 and 100,000 to/from 6-digit numbers.

Each time start with 457,849 and
subtract the number shown.

Read that as four hundred and fifty
seven thousand, eight hundred and
forty nine NOT 4-5-7-8-4-9.

100,000 less

457,849

357,849

Add and subtract 1, 10, 100, 1000, 10,000 and 100,000 to/from 6-digit numbers.

This time start with 457,849 and **add** the number shown.

100,000 more

457,849

557,849

Add and subtract 1, 10, 100, 1000, 10,000 and 100,000 to/from 6-digit numbers.

230,193

Practise finding 1, 10, 100, 1000, 10,000 and 100,000 more or less than these numbers.

10 more than 230,193 is 230,**203**; two digits have changed.

352,605

Usually, 1 digit changes. But be careful when there is a 9 or a 0 in the same place that you are adding or subtracting from.

10 less than 352,605 is 352,**595**.
