Name: \_\_\_\_\_ Date: \_\_\_\_\_

Draw a map of the settlement your school is in. Make sure your map is clear and easy to read. Using a key will help!

Megalopolis	A group of conurbations that have joined	>10,000,000 people
Conurbation	A group of large cities and their suburbs	3,000,000-10,000,000 people
Metropolis	A city and surrounding towns that have merged into each other	1,000,000-3,000,000 people
City	Wider range of services	100,000-1,000,000 people
Large Town	Wider variety of shops	20,000-100,000 people
Small Town	More services like secondary schools and police stations	1,000-20,000 people
Village	Basic services like a shop or petrol station	100-1,000 people
Hamlet	Tiny populations and very few services, sometimes no services	<100 people
Isolated Place	Often in rural areas, can be farm houses or holiday homes	a few buildings

High-order services are usually more expensive to run. They normally sell expensive items that are only bought occasionally. This means they are normally found in areas with a high population.

Low-order services are usually inexpensive. They normally sell cheaper items that are bought daily or weekly. They are often found in residential areas.

Low-order services	High-order services
post offices	leisure centres
doctors	department stores
newsagents	hospitals
grocers	jewellery shops
bakeries	furniture shops
hairdressers	secondary schools

Here are some examples of how the land in a settlement can be used.  
Can you identify examples of these in your settlement?
